Last month the company agreed to acquire the Burpar Gold Project in a high-grade gold district in southern Peru, near Ozinca Gold Plant.

The company has signed a binding term sheet for the acquisition and hopes to haul large quantities of feed on a bitumen highway to the plant, which is 150 kilometres away from a gold mine Oakdale picked up with the acquisition.

The company bought the plant in March 2019 and hopes to start work imminently on refurbishing the facility.

The company is preparing an engineering study for the refurbishment for regulators.

Oakdale is also close to finishing a detailed engineering study that will form the cornerstone of its regulatory submission for an expanded 120 tonnes per day approval and licensing process.
