## Global Energy Metals kicks off fieldwork at Lovelock cobalt mine, Nevada; further expands claim footprint

Global Energy Metals Corp (CVE:GEMC) (OTCMKTS:GBLEF) revealed that fieldwork has started at its Lovelock cobalt mine project in Nevada and said it had further increased its footprint in the area.

The past producing Lovelock mine consists of 70 unpatented lode claims in the Cottonwood Canyon area and totals around 1,400 acres (567 hectares).

### READ: Global Energy Metals expands claim footprint in Nevada as it's poised to advance battery metals project

The mine operated from 1883 to 1890 to the 100-foot level, reporting 500 tons of cobalt and nickel mineralized material shipped to England for processing.

GEMC's latest work is focused on identifying high-grade mineralized zones of cobalt, nickel and copper in the historical underground workings.

The initial work, via sampling and mapping, will bid to define structural controls in the known battery metal-rich areas and connect mineralized zones into broader targets in preparation for an inaugural drilling program.

Producing a property-wide geological model is an immediate priority as it is a very large exploration area, the firm said.

### New claims staked

Also in today's statement, the company said it had staked a further seven claims to add to the 11 it had staked earlier this month.

The new claims to the east of the historic mine shaft cover around 36 hectares, increasing the Lovelock cobalt mine property to a total of 678 hectares, within 88 mineral claims.

Some of these new claims are contiguous to both the Lovelock cobalt mine project and the historic Nickel mine in Cottonwood Canyon.

In January this year, the energy metals group inked a definitive agreement to acquire an 85% interest in the two 'highly prospective' cobalt projects in Nevada.

The Lovelock cobalt mine and the Treasure Box project are around 150 km east of the giant Tesla (NASDAQ:TSLA) Gigafactory in Sparks, Nevada, which churns out electric batteries to make cars.

The Lovelock and Treasure Box projects represent a "unique opportunity to make a new battery metals discovery in Nevada, a proven mining district ranked as the most attractive mining jurisdiction by the Fraser Institute's Annual Survey of Mining

### Company Synopsis:

*Global Energy Metals is focused on offering security of supply of cobalt, a critical material to the growing rechargeable battery market, by building a diversified global portfolio of cobalt assets including project stakes, projects and other supply sources. GEMC anticipates growing its business by acquiring project stakes in battery metals related projects with key strategic partners.*
