Mkango said it would evaluate all historical data over the Mchinji licence area for exploration targets in the context of geophysical data produced by a countrywide airborne survey completed by the World Bank in 2016. Exploration will focus on nickel-cobalt, gold, base metals, and graphite.

"We are commencing a full historical data review to identify exploration targets, and look forward to updating shareholders on this new licence in due course," said Alexander Lemon, the president of Mkango.
