## Carube Copper encouraged by high grade gold mineralisation at Main Ridge

Carube Copper Corp's CEO (CVE:CUC) Steve Hughes tells Proactive London's Andrew Scott he continues to be impressed with the prospectivity of their Main Ridge project (MR) in Jamaica.

A gold in soil anomaly has been identified, which has a minimum strike length of 2km and lies along trend of the former Pennants gold deposit.

Hughes adds that they've identified at least three potentially significant gold mineralized quartz vein structures at MR and the team's continuing to identify outcropping quartz and adularia veining.
